PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building backend systems in Node.js and TypeScript using PostgreSQL, MongoDB, Redis, REST APIs and gRPC in microservices architecture. Currently developing AGCX, a regulated crypto exchange for the UAE market, covering wallets, transactions, fiat on/off-ramp, KYC and fine-grained security. Previously built the complete digital platform for Design2Occupancy: website, CMS, CRM, work order and payment management, and Tally ERP integration with 400+ REST/gRPC APIs.

PROFESSIONAL EXPERIENCE

Full Stack Developer

June 2026 – Present

WrathCode Technology Private Limited | Jaipur, Rajasthan

- Develop backend services for **AGCX (Arab Global Crypto Exchange)**, a regulated crypto exchange for UAE and global markets, using Node.js, TypeScript, PostgreSQL, Redis, gRPC and microservices.
- Designed backend workflows for crypto wallets, deposits, withdrawals, transfers and full transaction lifecycle management, including state handling, validation and failure recovery.
- Implemented fiat-to-crypto and crypto-to-fiat flows with banking and financial provider integrations, including Zand Bank and CryptoSwift.
- Integrated Fireblocks for digital asset custody, Chainalysis for blockchain transaction screening, Binance APIs/services and Didit for KYC identity verification.
- Implemented authentication with Passkeys, Google OAuth 2.0/OIDC and Apple Authentication, and designed API key management for secure programmatic access.
- Implemented RBAC, ABAC and PBAC to control user, admin and policy-based access to sensitive financial operations.
- Designed PostgreSQL and MongoDB schemas for users, wallets, assets, currencies, transactions, roles, permissions, policies and API keys.
- Built gRPC inter-service communication following DDD and Clean Architecture; used Redis for caching across distributed services.
- Supported containerized deployment with Docker and Kubernetes across integration, testing and production support.

Full Stack Developer

June 2024 – May 2026

Octodo Solutions | Jaipur, Rajasthan

- Built and maintained the complete digital platform for **Design2Occupancy**, a green building and energy-efficiency consultancy: website, CMS, CRM, work order, payment and accounting workflows.
- Built the company website and a custom CMS for dynamic content management without developer involvement.
- Built automated company and project portfolio generation with a ranked project showcase for clients, replacing manual profile preparation.
- Designed, developed and maintained 400+ REST APIs and gRPC services across CRM, project management, authentication, notifications, reporting, workflow automation and integrations.
- Built a work order management and payment system; integrated Tally ERP for accounts and marketing teams with automated payment reminders and project/payment deadline follow-ups.
- Built microservices and modular backend systems following Clean Architecture and DDD, with clear separation of controllers, services, repositories and data-access layers.
- Implemented RBAC, ABAC and PBAC authorization, JWT/OAuth 2.0 authentication and WebSocket-based real-time notifications and status tracking.
- Integrated 4+ enterprise systems (Google OAuth, Google Drive API, Insightly CRM, HubSpot CRM, Tally ERP) into unified workflows, reducing manual processes.
- Optimized PostgreSQL and MS SQL Server schemas, indexes and complex queries, improving application performance by approximately 25%.

PROJECTS

AGCX (Arab Global Crypto Exchange) – Regulated Crypto Exchange Platform (UAE)

arabglobal.ae

- Microservices-based crypto exchange covering digital asset trading, wallets, fiat deposits, KYC, security and back-office operations.
- Built services for Buy/Sell, wallets, deposits, withdrawals, transactions, currency management, referral, KYC and admin/back-office.
- Built blockchain transaction workflows with validation, provider integration, status tracking and failure handling.
- Integrated Fireblocks, Chainalysis, CryptoSwift, Zand Bank, Binance and Didit KYC; implemented Passkeys, OAuth 2.0/OIDC, API keys and RBAC/ABAC/PBAC.

Technologies: Node.js, TypeScript, PostgreSQL, MongoDB, Redis, REST, gRPC, Microservices, DDD, Docker, Kubernetes

Walker Red Blue – CRM, Work Order & Payment Management Platform (Design2Occupancy)

wbhubs.walker-blue.com (Admin Panel)

- Developed 400+ REST APIs and gRPC services covering authentication, CRM, project management, work orders, payments, reporting, notifications and integrations.
- Built domain services including Project Dashboard, Feasibility, EnergyQC, RepGenX, Notification and Support & Communication.
- Built work order and payment management with Tally ERP integration and automated payment and deadline follow-ups.
- Implemented RBAC, ABAC, PBAC, WebSockets, background processing and integrations with Google OAuth, Google Drive, Insightly CRM and HubSpot CRM.

Technologies: Node.js, TypeScript, React.js, PostgreSQL, MS SQL Server, Sequelize, gRPC, WebSockets

Design2Occupancy – Company Website, CMS & Portfolio Automation

www.design2occupancy.com

- Built the public company website and a custom CMS for dynamic content management.
- Built automated company and project portfolio generation, reducing manual profile preparation.
- Built a ranked project showcase so clients can view the most relevant projects first.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, REST APIs, gRPC, WebSockets, Sequelize

Frontend: React.js, Redux, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MongoDB, MS SQL Server, Redis, Database Design, Indexing, Query Optimization, Transactions

Architecture: Microservices, Domain-Driven Design, Clean Architecture, Modular Architecture, Distributed Systems

Security: Passkeys, OAuth 2.0, OIDC, JWT, API Keys, Google & Apple Authentication, RBAC, ABAC, PBAC

FinTech & Crypto: Crypto Exchange, Crypto Wallets, Digital Assets, Fiat-to-Crypto, Crypto-to-Fiat, Banking APIs, KYC, Fireblocks, Chainalysis, Binance APIs, CryptoSwift, Zand Bank, Didit

Business Systems: CRM, CMS, Work Order Management, Payment Systems, Tally ERP Integration, Workflow Automation

DevOps & Tools: Docker, Docker Compose, Kubernetes, Linux, Nginx, PM2, Git, GitHub, GitHub Actions, Postman, Swagger/OpenAPI, n8n, AWS, CI/CD

Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Design Patterns

EDUCATION

Bachelor of Technology – Electrical Engineering

2020 – 2024

Arya College of Engineering & IT, Kukas, Jaipur | CGPA: 9.0 / 10

CERTIFICATIONS & TRAINING

- Full Stack Fellowship Program – Crio.do
- DevOps Training Program – Grass.com

LANGUAGES

English: Professional Working Proficiency | Hindi: Native / Fluent
